### **The All New Story**

To reboot the narrative, Toxic Games brought in industry veteran Rob Yescombe, writer on franchises including CRYISIS, ALIEN: ISOLATION, STAR WARS and PS4's upcoming RIME; winner of Best Thriller Screenplay at the Creative World Awards, and the screenwriting Award of Excellence at the Canada International Film Festival.

“The Director’s Cut is a single-location thriller” says Yescombe, “It’s about figuring out what the Qube is, and why you’re inside it. You’re told you are an astronaut inside some kind of alien structure hurtling towards Earth, but it’s also about something deeper than that.”

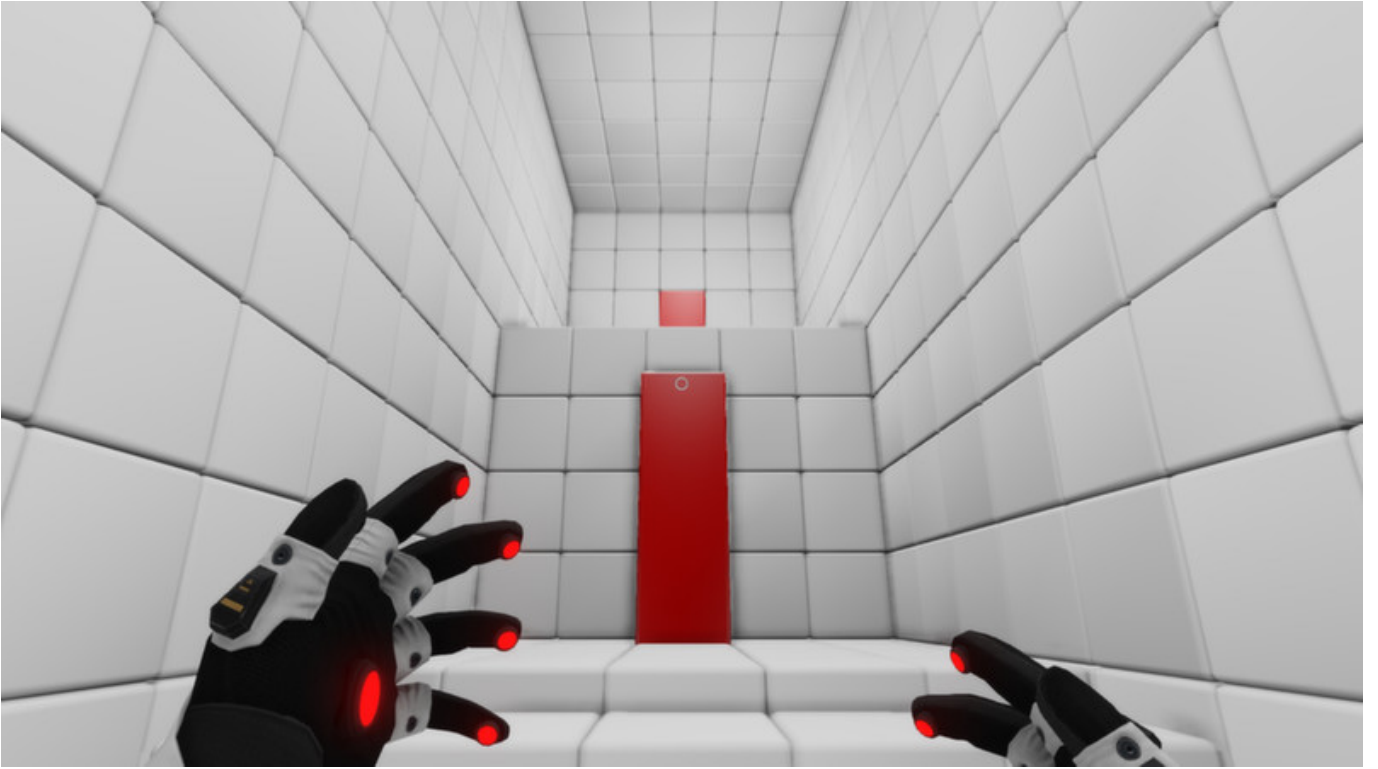

Under the surface, there is a subtext about games themselves – “We are conditioned to expect death and doom. We’re resigned to it. At its heart, this story is about that state of mind and how it effects the way we view our experiences, in games and in life. The Director’s Cut will feel either heroic or unnerving, depending on your own personal trust issues.”

This is a great puzzle game with some really satisfying puzzles. However, I can't recommend this game because it is not color-blind friendly. I find that some of the more complex puzzles rely strictly on one's ability to see color, which often means that I have to just resort to trial and error

A real shame, this game is great :( A very competent puzzle game. Despite only being able to pull and push blocks, it sure throws at you a bunch of inventive puzzles, just as I like them best.
